- Managed to convert at least 50% of phone orders to digital during the firsts 3 months of release
- Set up to handle cooking pots returns as also as shipping orders
- Maintained relations with the restaurant's owner and applied changes meeting deadlines

PROJECTS

Anthropocene.otf [link](#)

2019 – 2020

Developed the Front-End Part of the website - Group Project, 4 People

The idea of this project won the “Federico Alessandri Prize” in 2019, materialized during the course of 2020 and presented at the “Surprise” exhibition, Pesaro, IT.

Anthropocene.otf is a parametric typeface that will change design based on the air pollution level in the world.

Users can import the font via CDN into their websites, viewers will receive the corresponding weighted font based on their location, the project aims to give people awareness about their air quality.

- Built with vanilla Javascript, HTML & CSS, 0 frameworks, using AQI APIs.
- Developed using git and deployed on GitHub with GitHub Pages. [repository link](#)
