- Accomplished 10+ successful group projects often focused on code-related artistic ideas.

## Experience

### Full-Stack Developer

2018 - present

During university and in the past two years, I have had the opportunity to challenge myself in creating different web applications for both didactic and professional purposes.

Whether it is to satisfy client requests or to increase awareness on certain social issues, I'm always glad to program a tool that helps in the purpose.

You can check my social profiles and my portfolio to know more about my projects.

### Polpo di Fulmine

Built and maintained 1 Food Delivery Mobile App for a restaurant | Android & iOS [Link](#)

- Fully working mobile app in React Native with custom back-end in PHP/MySQL on a Linux VPS.
- Online secure payments with Stripe API Integration & Push notifications for orders status.
- Managed to convert at least 50% of phone orders to digital during the firsts 3 months of release.
- Set up to handle cooking pots returns as also as shipping orders.
- Maintained relations with the restaurant's owner and applied changes meeting deadlines

### Anthropocene.otf [Link](#)

Developed the Front-End Part of the website.

The idea of this project won the "Federico Alessandri Prize" in 2019, materialized during the course of 2020 and presented at the "Surprise" exhibition, Pesaro, IT.

Anthropocene.otf is a parametric typeface that will change its design based on the air pollution level in the world.
