About Me

I am a multidisciplinary and approachable developer who is eager to improve his skills in designing and creating state of the art products for end users.

My drive and motivation are fueled by the challenge of creating functional, user-friendly websites that appeal to the users.

Interests

I have a wide range of interests extending from advanced domotics to figurative art, reason for which I am often involved in carrying on a side-project, be it an aerial switch or an artistic project that explores ultrasounds.

When it comes to hobbies, I consider myself being very multifaced, but I prefer group and cooperative activities such as playing instruments or sports and creative gatherings.

Work experience

Front-end Developer

2018 - present

During university and in the past two years, I have had the opportunity to challenge myself in creating different web applications for both didactic and professional purposes, I also built a variety of tools out of my personal interest for experiment.

Tech Stack:

Front-end:		Back-end:		Others:	
HTML/CSS	●●●	NodeJS	●●●	GitHub	●●●
JavaScript	●●●	Express	●●●	DigitalOcean	●●●
React	●●●	MongoDB	●●●	Agile	●●○
TypeScript	●●○	PHP	●●○	Firebase	●●○
Angular	●●○	Java	●○○	Linux	●○○

Soft Skills:

Team work	Active Listening
Problem solving	Empathy
Logic skills	Understanding
Proactivity	Responsibility

I am glad to have had several opportunities to improve some personality traits, expecially through my lastest experience at Ironhack that taught me how to be more organized and to be a better team player.
Previous volunteering experiences also raised my awareness towards the struggles of students with specific learning disorders.

Projects

Whether it is to satisfy client requests or to increase awareness on certain social issues, I'm always glad to program a tool that helps in the purpose.
You can check my social profiles and my portfolio to know more about my projects.
